Efficient workflows

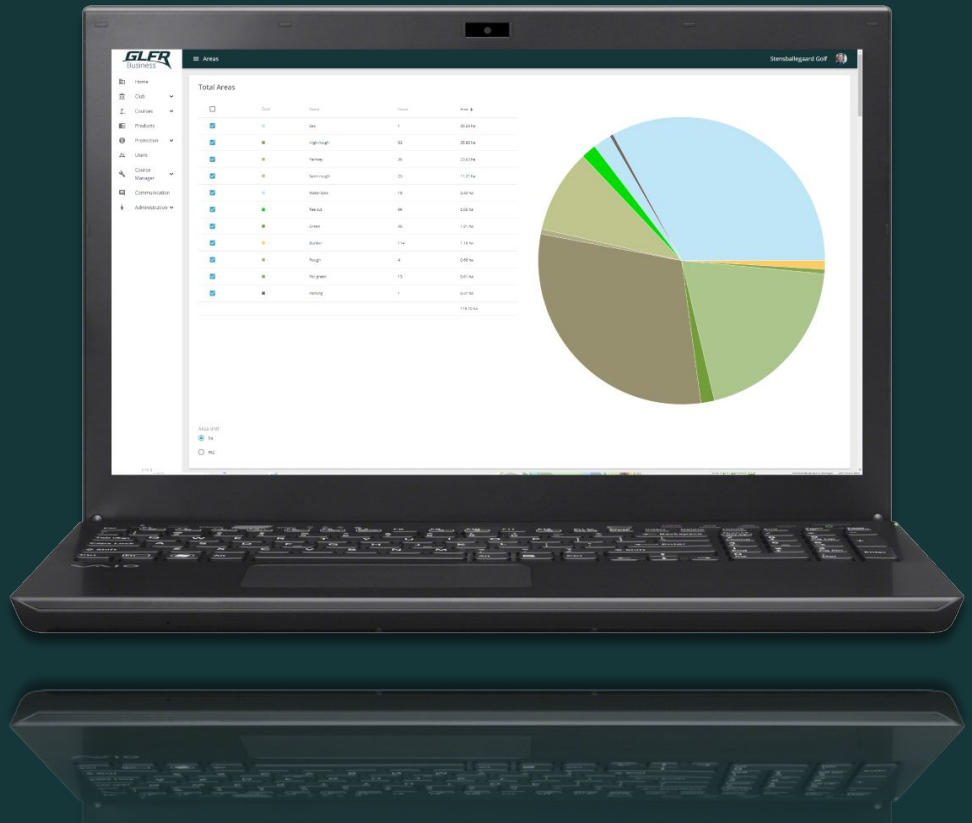
Course mapping

- The course is initially mapped by Ingenium Golf
    - Cut areas, bunkers, water streams and lakes, paths and roads, forrest

Efficient workflows

Easy mapping

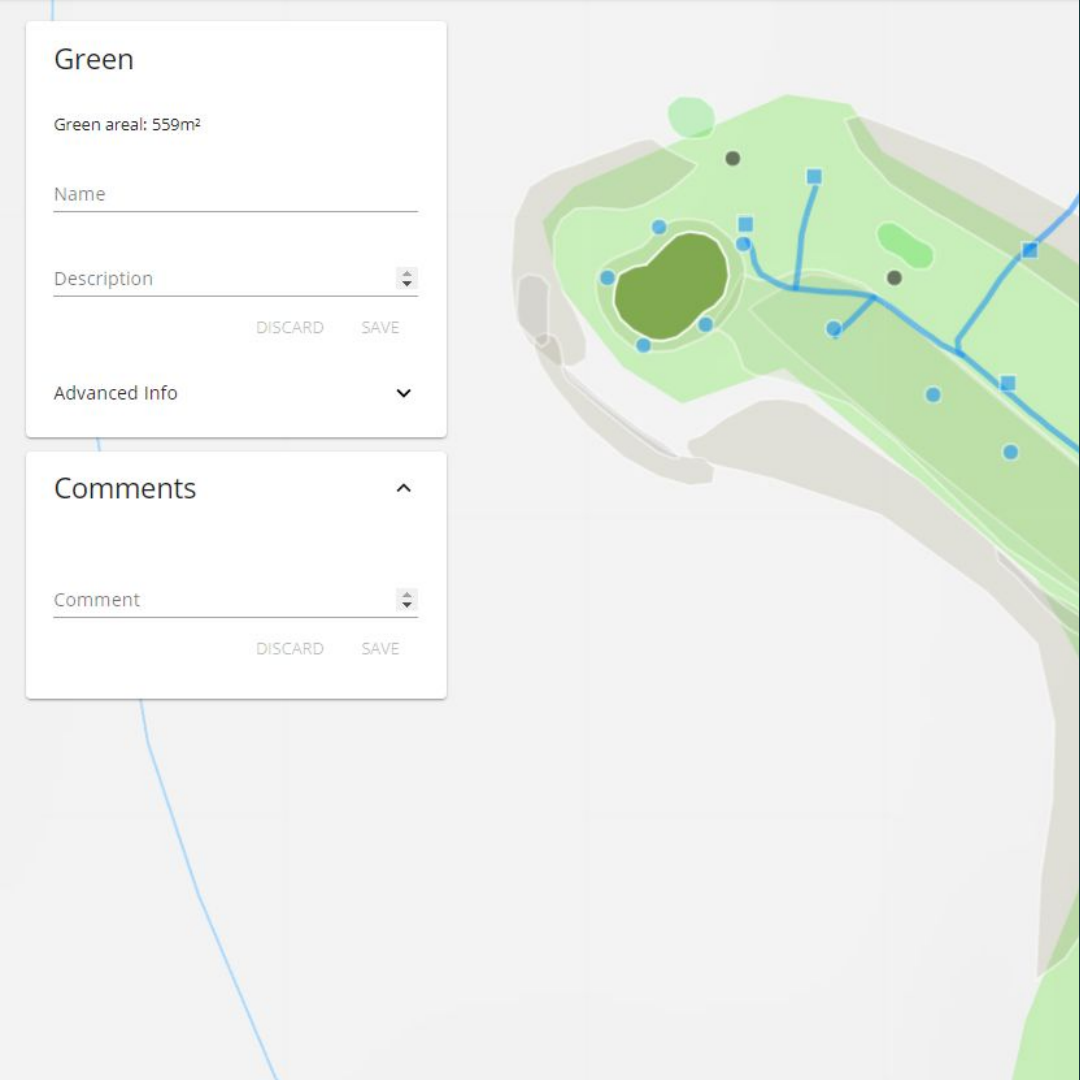
- GLFR Course Manager app
- User-friendly interface
- Easy mapping of course changes
- Easy mapping and documentation of tech elements
- Use high-precision GPS as needed



Area calculations

Areal calculations

- Size of total areas
  - Table with all areas
  - Graphical presentation
- Selection, e.g. all grass areas
- Size of selected element
- Size of a number of selected elements



Area calculations

Areal calculations

- Size of total areas
  - Table with all areas
  - Graphical presentation
- Selection, e.g. all grass areas
- Size of selected element
- Size of a number of selected elements

Course overview

Tech maps on web

- See all course and tech elements
- Select the needed layers

Documentation of course and tech

Add information for each element

- Name
- Description (e.g. model- and serial number)
- Other relevant information
- Give access to this information to e.g. all greenkeepers

Register work on the course

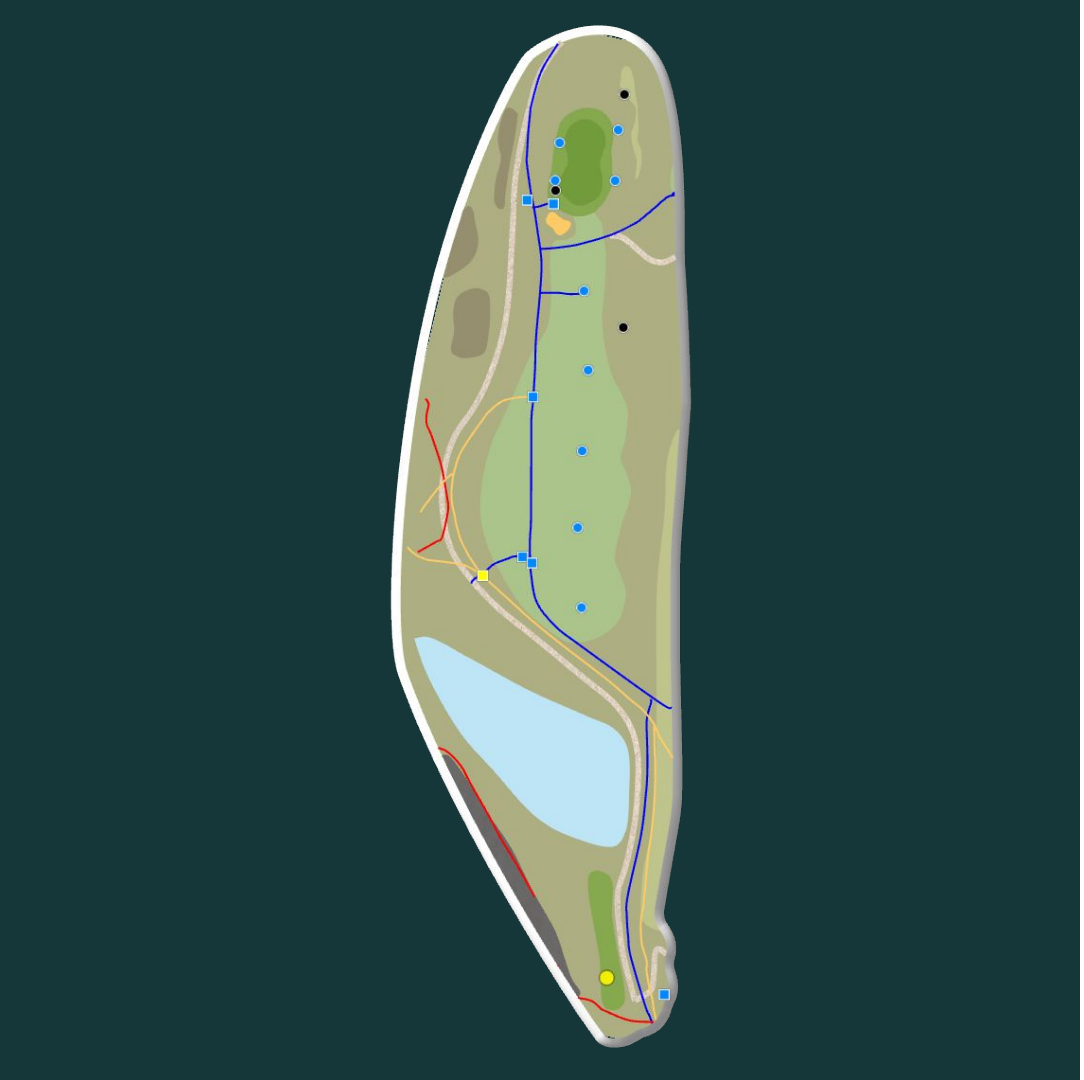
Logbook for each element

- Add comments
  - Repair
  - Replacement
  - Service
  - Other information
- See full history of e.g. a sprinkler

Tech maps

Tech map - course overview

- select layers and elements as needed
  - the full irrigation system
  - drainage map
  - ...



Tech maps

Tech map per hole

- select layers and elements as needed

Heat maps

Heat map is a future option !

- Heat maps per hole with selection of
  - time of year
  - certain dates, e.g. a tournament
  - HCP and sex

Success factors:

- Instruct the players how to use the GLFR scorecard !!
- Explain why this is value information for the club !
